DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 46-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Obora et al. ("Nonsuture Microvascular Anastomosis Using Magnet Rings," Neurol Med Chir (Tokyo); January 16, 1980, pp. 497-505 and pp. 1-8 of the English Translation). Obora et al. disclose, at least in figure 1 and in paragraph II(b) on pages 2 and 3, paragraph 3 on page 4, and paragraph IV(1) on page 8 of the English Translation; a method of forming a magnetic port in a first hollow body, the first hollow body having a lumen, where the method includes forming an opening in a wall of the first hollow body, providing a first securing component capable of producing a magnetic field (i.e., a spur of pure iron that is capable of producing a magnetic field upon coupling to a magnet or the combination of the spur and "an additional magnet ring" (according to page 8 of the English Translation) and having an opening, coupling the first securing component to the first hollow body by solely a mechanical attachment (via the spurs) to form a magnetic port, providing a second securing component (a spur-and-magnet ring combination) capable of producing or being attracted by a magnetic field, joining the second securing component to a second hollow body, and coupling the second securing component to the magnetic port to form an end-to side anastomosis.
